SUMMARY

3+ years of experience building scalable backend systems, with contributions to frontend and infrastructure. Proficient in multiple programming languages, including **Node.js**, **TypeScript**, **JavaScript**, and **Python**. Master's in Computer Science. Built and optimised services supporting ~10 million active user sessions. Active open-source contributor.

EDUCATION

CALIFORNIA STATE UNIVERSITY, SAN BERNARDINO | M.S in Computer Science | GPA: 3.9/4.0 Aug 2023 - May 2025

Courses: Analysis of Algorithms, Distributed Systems, Machine Learning, AI, Database Systems, Advanced Operating Systems

PANIMALAR INSTITUTE OF TECHNOLOGY | Bachelor of Engineering in Computer Science | CGPA: 8.2/10 Aug 2016 - May 2020

Courses: Algorithms, Data Structures, Operating Systems, Cloud Computing, Compilers, Web Technologies

SKILLS

Languages, Runtimes, & Frameworks: NodeJs, TypeScript, Java, Python, Scripting (Shell, Bash), React, Express

Data Management & Core Principles: Redis, Kafka, MongoDB, PostgreSQL, MinIO, Data Structures, OOP

Cloud, Orchestration, and Version Control: Docker & Kubernetes, AWS & Azure, Git, Github Actions

EXPERIENCE

YELLOW.AI | Software Development Engineer | Bangalore, India Nov 2021 - Aug 2023

- Led **Node.js** and **TypeScript** backend development for a conversation designer, enabling self-service customers to generate and sync chat and voice flows from design mockups, reducing development time by ~40%
- Built a conversation log management system using Rest API, MinIO, Docker, and Kubernetes, handling ~10M sessions—reduced Jira tickets by ~5%, enhanced debugging, and improved analysis for service teams
- Led migration to **OOP** microservice from legacy functional service, using **Redis** and **unleash feature flags**, achieving a ~50% reduction in response times, production issues, improving architectural clarity
- Engineered a **TypeScript-based LLM** microservice with MongoDB to manage model data, tokens, and invocations, enabling secure integration across internal services and customer apps, improving user goal completion by 25%
- Configured **Kubernetes HPA** based on traffic, optimized resource limits, enhanced observability, and increased test coverage—reducing manual intervention by 30% and improving system performance as an on-call engineer

KHATABUDDY | Freelance Software Development Engineer | Remote, India Jun 2022 - Oct 2022

- Implemented a **React** interface with a **Node.js**, **Java** backend to generate and display customer invoices using **PostgreSQL** in under a minute, including inventory management
- Devised a **React** dashboard for tracking balance sheets, ledgers, inventory management helping secure early customers

YELLOW.AI | Software Engineer | Bangalore, India Aug 2020 - Oct 2021

- Automated customer interactions by developing and deploying NLP-driven chatbots using **Node.js** and **Python**, enabling seamless end-user engagement and reducing operational costs by 60%
- Built a **Python** and **Streamlit** app to securely analyze customers codebases across 5 regional databases, helping leaders make decisions 80% faster and supporting migration to cloud.yellow.ai's low-code platform

NOTABLE PROJECTS

Inbox Zero (Open Source) | github.com/gowthamkishore3799/inbox-zero Apr 2025 - Present

- Automated multi-platform Docker image builds with GitHub Actions, YAML, Bash scripting, and semantic versioning to reduce manual setup time and accelerate onboarding for new developers
- Optimized build and run workflows by leveraging Docker cache to significantly reduce initial build times

Agentic Information Retrieval – OctoRag | github.com/gowthamkishore3799/OctoRag Feb 2025 - Mar 2025

- Developed an agentic RAG system using Python, Gradio, and ijson to analyze ~3.2M GitHub repos dataset for retrieving repos based on complex queries, leveraging Langchain with Redis for context management
- Achieved 90% accuracy in retrieving repositories using tools like ArangoDB, FastAPI, and NetworkX algorithms

GitIngest (OpenSource | ~10K+ stars) | github.com/cyclotruc/gitingest Dec 2024 - Jan 2025

- Resolved branch parsing issues using **Python** subprocess for branch URLs and downloads, engineered a test suite for CLI and web interfaces, reducing parsing failures and increasing test coverage by 10%
