gowthamkishore3@gmail.com | (909) 577-3452 | San Bernardino, CA, USA

SUMMARY

3+ years of experience building **backend systems**, with **frontend** and **infrastructure** contributions. Proficient in **Node.js**, **TypeScript**, and **Python**. Master's in Computer Science. Built and optimised services handling ~10 million users session. Open-source contributor.

EDUCATION

CALIFORNIA STATE UNIVERSITY, SAN BERNARDINO | M.S in Computer Science | GPA: 3.9/4.0 Aug 2023 - May 2025

Courses: Analysis of Algorithms, Distributed Systems, Machine Learning, AI, Database Systems, Advanced Operating Systems

PANIMALAR INSTITUTE OF TECHNOLOGY | Bachelor of Engineering in Computer Science | CGPA: 8.2/10 Aug 2016 - May 2020

Courses: Algorithms, Data Structures, Operating Systems, Cloud Computing, Compilers, Web Technologies

SKILLS

Languages, Runtimes, & Frameworks: Node.js, TypeScript, Java, Go, Python, Scripting (Shell, Bash), React, Express

Data Management & Core Principles: Redis, Kafka, MongoDB, PostgreSQL, MinIO, Data Structures, OOP

Cloud, Orchestration, Monitoring & DevOps: Docker & Kubernetes, AWS & Azure, Git, Github Actions, Prometheus

EXPERIENCE

Founding Engineer | KHATABUDDY (Startup| Part time) | Remote Jun 2024 - Nov 2024

- Contributed to development using **React**, **Java** MVC implementing role-based access control for inventory, ledger management
- Optimized invoice generation performance by ~30%, improving PostgreSQL reads with indexed scans and query restructuring
- Developed **Prometheus**-based monitoring for client inventory APIs, tracking response times, CPU/memory usage improving service reliability

Software Development Engineer | YELLOW.AI | Bangalore, India Nov 2021 - Aug 2023

- Led backend development in **Node.js** and **TypeScript** for a conversation designer, enabling self-service customers to generate chat/voice flows from design mockups, reducing development time by ~20%
- Designed and deployed a multi-region conversation log management system using **React**, **REST**, **MinIO**, and **Kubernetes** on **AWS/Azure**, handling 10M+ sessions with TTL retention to enhance debugging and traceability
- Engineered a **React-Node.js** LLM feature with **MongoDB** and extending **IAM** roles to manage model configs, tokens, and metadata, invocations, enabling safe internal and customer application integrations, boosting goal completion
- Led microservice migration (**Functional Node.js** to **object-oriented TypeScript**), using Redis, Unleash, Strangler Fig pattern, reducing response times by ~25% and improved architectural clarity
- Engineered a **Kafka-driven** voice campaign system with backpressure and dynamic K8s scaling, reducing DB load and infra cost while handling 1M+ events

Software Engineer | YELLOW.AI | Bangalore, India Aug 2020 - Oct 2021

- Designed and deployed multiple NLP-driven automation using **Node.js** and **Python**, slashing operational costs by 60%
- Devised a Python and Streamlit app to visualize customer automation workflows, ingesting data from 5 distributed databases, helping leaders accelerate decisions by 80% and enabling the transition to cloud.yellow.ai from app.yellow.ai

NOTABLE PROJECTS

Inbox Zero (Open Source) | github.com/elie222/inbox-zero Apr 2025 - May 2025

- Built **Docker** release pipelines in **GitHub Actions** for a Next.js monorepo, saving 30+ mins per setup and speeding up onboarding
- Optimized build workflows with **Docker cache** and implemented semantic versioning, significantly reducing initial build times

Agentic Information Retrieval – OctoRag | github.com/gowthamkishore3799/OctoRag Feb 2025 - Mar 2025

- Built an agentic RAG pipeline using **Python**, **LLMs**, **langchain**, **ArangoDB** to analyze 3.2M+ GitHub repos with 90% query accuracy
- Integrated **Comet** for GenAI monitoring, benchmarking, evaluation, enhancing observability and model performance insights

GitIngest (OpenSource | ~10K+ stars) | github.com/cyclotruc/gitingest Dec 2024 - Jan 2025

- Fixed branch fetching failures with special characters by implementing **Python** subprocess, reducing fetch errors
- Implemented a **Pytest** test suite for **CLI** and web interfaces, minimizing parsing failures and increasing test coverage by 10%

ACHIEVEMENTS

- Spotlight Awards (2022, 2023) | Yellow.ai:** For leading high-impact backend features and resolving critical support issues
