SUMMARY

Engineer with **3 years of experience** in building scalable systems. Masters in Computer Science. Proficient in Node.js, Typescript, Javascript and Python with expertise in databases and cloud services.

EDUCATION

CALIFORNIA STATE UNIVERSITY, SAN BERNARDINO | M.S in Computer Science | GPA: 3.9/4.0 Aug 2023 - May 2025

Courses: Analysis of Algorithms, Distributed Systems, Machine Learning, AI, Database Systems, Advanced Operating Systems

PANIMALAR INSTITUTE OF TECHNOLOGY | Bachelor of Engineering in Computer Science | GPA: 3.2/4.0 Aug 2016 - May 2020

Courses: Algorithms, Data Structures, Operating Systems, Cloud Computing, Compilers, Web Technologies

SKILLS

Languages, Runtimes, & Frameworks:	NodeJs, TypeScript, Go(GoLang), Python, Scripting (Shell, Bash), React, Express
Data Management & Core Principles:	Redis, Kafka, NoSQL (MongoDB), SQL, PostgreSQL, MinIO, Data Structures, OOP
Cloud, Orchestration, and Version Control:	Docker & Kubernetes, AWS & Azure, Git, Github Actions
Core Competency:	Agile/Scrum, Problem-Solving, Detail-Oriented, Strong Teamwork, Communication

EXPERIENCE

YELLOW.AI | Software Development Engineer | Bangalore, India Nov 2021 - Aug 2023

- Engineered a backend no-code conversation designer utilizing Node.js and TypeScript that transforms design mockups into operational chat and voice flows, resulting in a 40% reduction in development time
- Collaborated to and led the migration from a legacy functional programming to a TypeScript-based **OOP** microservice, using **feature gates** and **Redis**, improving architectural clarity and reducing response times and production issues by 35%
- Implemented client-specific multi-LLM feature for LLM invocation, rate limits, usage monitoring, and alerts, utilizing **MongoDB**, **Typescript** for metadata and token storage, resulting in 25% performance improvement
- Collaborated on a microservice for managing conversational AI debug logs using **minIO**, **AWS**, **Azure**, **Docker**, and Kubernetes, implementing TTL to reduce log accumulation and storage costs
- Functioned as on-call engineer, optimizing performance with **HPA**, handling alerts and production bugs, updating documentation, and configuring test suites, reducing manual testing effort by 30%

KHATABUDDY | Freelance Software Development Engineer | Remote, India Jun 2022 - Nov 2022

- Developed a user-friendly interface with **React.js** and backend systems with **Node.js** and **Express** to display invoice balances and generate dynamic invoice reports from templates under a minute, using **PostgreSQL** data
- Devised a dashboard for tracking overall transactions and billing, leading to the acquisition of the first set of customers

YELLOW.AI | Software Engineer | Bangalore, India Aug 2020 - Oct 2021

- Automated tasks by building and deploying NLP-driven AI solutions using Node.js and Python, enhancing customer service and reducing operational costs by 60%
- Integrated third-party payment, CRM, and agent systems using **Node.js**, increasing agent productivity to 50%
- Devised a data application with **Python** and **Streamlit** to analyze app.yellow.ai's codebase, helping leaders to make informed decisions **80% faster** and supporting the transition to cloud.ai

NOTABLE PROJECTS

Agentic Information Retrieval – OctoRag | github.com/gowthamkishore3799/OctoRag Feb 2025 - Mar 2025

- Developed an agentic graph RAG system for hackathon, analyzing 3.2M GitHub repositories using Python, Gradio, ijson
- Implemented tools, such as Gitingest, ArangoDB queries, and NetworkX algorithms, leveraging Langchain with memory management to retrieve information for complex queries
- Addressed data processing challenges for 5.1M records by leveraging ijson to optimize large-scale data handling

GitIngest (OpenSource) | github.com/cyclotruc/gitingest Dec 2024 - Jan 2025

- Resolved branch parsing issues using Python subprocesses to fetch remote URLs, ensuring accurate repository retrieval
- Engineered a test suite for CLI and web interfaces, minimizing parsing failures and increasing test coverage by 10%

Azure SQL & Serverless Integration | github.com/SE-Team-4-2024/azure_db_functions Feb 2024 - Mar 2024

- Led the setup, design, and deployment of an **SQL** database on **Azure** for game scoreboard tracking, including schema design, efficient indexing, and CRUD operations to ensure faster data retrieval and improved performance
- Deployed CRUD APIs in Azure Serverless Functions and integrated the frontend interface with C# in Unity, optimizing for a serverless architecture in the game
