gowthamkishore3@gmail.com | (840) 877-1657 | San Bernardino, CA, USA

SUMMARY

3+ years of experience building scalable backend systems, with contributions to frontend and infrastructure. Proficient in multiple programming languages, including **Node.js**, **TypeScript**, **JavaScript**, and **Python**. Master's in Computer Science. Built and optimised services supporting ~10 million active user sessions. Active open-source contributor.

EDUCATION

CALIFORNIA STATE UNIVERSITY, SAN BERNARDINO | M.S in Computer Science | GPA: 3.9/4.0 Aug 2023 - May 2025
Courses: Analysis of Algorithms, Distributed Systems, Machine Learning, AI, Database Systems, Advanced Operating Systems

PANIMALAR INSTITUTE OF TECHNOLOGY | Bachelor of Engineering in Computer Science | CGPA: 8.2/10 Aug 2016 - May 2020
Courses: Algorithms, Data Structures, Operating Systems, Cloud Computing, Compilers, Web Technologies

SKILLS

Languages, Runtimes, & Frameworks: NodeJs, TypeScript, Java, Python, Scripting (Shell, Bash), React, Express
Data Management & Core Principles: Redis, Kafka, MongoDB, PostgreSQL, MinIO, Data Structures, OOP
Cloud, Orchestration, Monitoring & DevOps: Docker & Kubernetes, AWS & Azure, Git, Github Actions, New Relic

EXPERIENCE

YELLOW.AI | Software Development Engineer | Bangalore, India Nov 2021 - Aug 2023

- Led Node.js and TypeScript backend development for a conversation designer, working with PMs and cross-functional teams to enable self-service customers to sync chat/voice flows from mockups, reducing development time by ~20%
- Built a conversation log management system using Rest API, MinIO, Docker, and Kubernetes, handling ~10M sessions—reduced Jira tickets by 20%, enhanced debugging, and improved analysis for service teams
- Led migration to **OOP** microservice from legacy functional service, using **Redis** and **unleash feature flags**, achieving a ~25% reduction in response times, production issues, improving architectural clarity
- Engineered **TypeScript-based LLM** microservice with MongoDB to manage model data, tokens, and invocations, tracking, enabling secure integration across internal services and customer apps, improving user goal completion by **25%**
- Optimized **Kubernetes HPA** based on traffic, fine-tuned resource limits, enhanced observability, and increased test coverage by 10%, addressing critical alerts and production bugs, improving system performance as an **on-call engineer**

KHATABUDDY | Freelance Software Development Engineer (Part time) | Remote, India Jun 2022 - Oct 2022

- Implemented a **React** interface with a **Node.js**, **Java** backend to generate and display customer invoices using **PostgreSQL** in under a minute, including inventory management
- Devised a **React** dashboard for tracking balance sheets, ledgers, inventory management helping **secure early customers**

YELLOW.AI | Software Engineer | Bangalore, India Aug 2020 - Oct 2021

- Automated customer interactions by developing and deploying NLP-driven chatbots using **Node.js** and **Python**, enabling seamless end-user engagement and reducing operational costs by 60%
- Built a secure **Python** and **Streamlit** app to visualize customer workflows across five regional databases, helping leaders accelerate decisions by **80%** and enabling **migration to cloud.yellow.ai's** low-code platform from app.yellow.ai

NOTABLE PROJECTS

Inbox Zero (Open Source) | github.com/gowthamkishore3799/inbox-zero Apr 2025 - Present

- Automated multi-platform Docker image builds with **GitHub Actions**, **YAML**, and **Bash** scripting in a Next.js monorepo, reducing manual setup by 30 minutes and accelerating new developer onboarding
- Optimized build and run workflows by leveraging Docker cache to significantly reduce initial build times

Agentic Information Retrieval – OctoRag | github.com/gowthamkishore3799/OctoRag Feb 2025 - Mar 2025

- Developed an agentic Graph RAG system using LLMs, Python, Gradio, and ijson to analyze ~3.2M GitHub repositories
- Achieved 90% accuracy in responding to queries by retrieving and analyzing relevant GitHub repositories, leveraging ArangoDB, NetworkX, and Gitingest, and integrating Comet for GenAI monitoring, benchmarking, and evaluation

ACHIEVEMENTS

- Spotlight Awards, Yellow.ai | 2022, 2023** — Awarded for leading high-impact backend features, mentoring new graduates, and accelerating support and service team issue resolution with strong ownership
